Dear George:

Enclosed are the original and one signed copy of Amendment 10 to Contract A101.

There are a number of minor errors in the amendment in quantities of equipment and dollar amounts which were discussed fully with Dan during his visit. These errors can be corrected in subsequent amendments.

As we advised Dan, we would like to have a cost appendix similar to those which have been previously included in the contract incorporated as a part of this amendment. This document relates all of the funding in the contract to our proposals by CMCC Numbers and clearly identifies any funding which represents estimates not supported by formal proposals from us. We believe it is important to include this information as a part of the formal contract document since it serves to incorporate our proposals into the contract; clearly establishes the bases for fixed fee; specifically identifies those costs which are estimates; and clearly establishes the derivation of the funding. It is our understanding that Dan agreed with this point of view and will prepare such an appendix for incorporation into the contract at an early date.

We understand you have included some additional funding in the support section of the contract where we had proposed minimum estimates for spares and other support equipment. These additions all seem reasonable to us and the additional funds will be required to meet the developing support requirements.

In other respects, the contract agrees with our understanding of the present scope of work.

Sincerely,

*Bob*

Bob
